DYED PHOTORESISTS AND METHODS AND ARTICLES

OF MANUFACTURE COMPRISING SAME

Honorable Commissioner of Patents and Trademarks Washington, D.C. 20231

Dear Sir:

RESPONSE

Responsive to the office action dated December 16, 1997, please amend the abovereferenced application as follows:

IN THE CLAIMS

Please amend the claims as follows:

1. (amended) A photoresist composition comprising a [resin] polymer binder, a photoactive component and a dye compound that contains anthracene groups, said dye compound being a polymer wherein the polymer has a weight average molecular weight of at least about 5,000.

Cangel claims 2 and 3.

10. (amended) A photoresist that comprises a resin binder, a photoactive component and a polymeric dye that contains one or more polycyclic chromophores, said chromophore being selected from the group consisting of phenanthryl, acridine, quinolyinyl and ring substituted quinolyinyl.
